Notes

- i. A combination of actual fund returns and market index returns have been used to determine the risk indicator as the fund has not been operating for the required five years. The risk indicator may therefore provide a less reliable indicator of the fund's future volatility. Market index returns have been used until February 2024 and fund returns thereafter.
- ii. As the InvestNow Foundation Series Hedged US 500 Fund only started accepting contributions on 8 February 2024 historical fee information is not available. The fund charges represent our best estimates of the fees and expenses that will be charged to the fund. These have been estimated using information provided by the underlying fund manager and by reference to the underlying fund's disclosure documents.
- iii. The top 10 assets add up to more than 100% of NAV as the fund also has liabilities which offsets these assets.
