

Fund Update

For the quarter ended 31 March 2025

- **InvestNow KiwiSaver Scheme**
- **InvestNow Foundation Series Hedged Total World Fund**

This fund update was first made publicly available on: 1 May 2025

What is the purpose of this update?

This document tells you how the InvestNow Foundation Series Hedged Total World Fund has performed and what fees were charged. The document will help you to compare the fund with other funds. FundRock NZ Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

Description of this fund

Objective: aims to provide returns that are broadly in line with the return of the underlying fund's investment benchmark before fees and tax over the long-term. The underlying fund aims to have all foreign currency exposure hedged to the New Zealand dollar.

Strategy: provides exposure to a single sector fund that invests into an ETF that in turn invests in shares of large, mid-sized and small companies listed on international stock markets.

| | |
|--------------------------------------|-----------------|
| Total value of the fund | \$7,453,865.97 |
| Number of members in the fund | 292 |
| The date the fund started | 8 February 2024 |

What are the risks of investing?

Risk indicator for the InvestNow Foundation Series Hedged Total World Fund ⁱ.

| | | | | | | |
|-----------------------------|---|---|---|------------------------------|---|---|
| ⇐ Potentially lower returns | | | | Potentially higher returns ⇒ | | |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| ⇐ Lower risk | | | | Higher risk ⇒ | | |

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at <https://sorted.org.nz/>.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

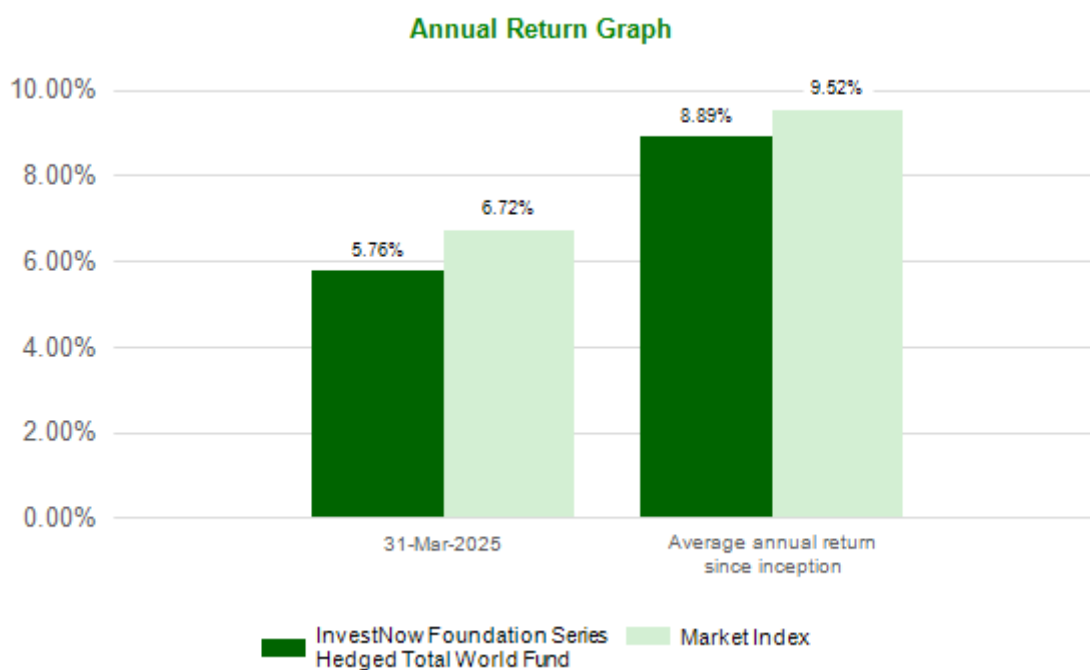

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for 5 years to 31 March 2025. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the product disclosure statement (**PDS**) for more information about the risks associated with investing in this fund.

How has the fund performed?

| | Past year |
|--|-----------|
| Annual return (after deductions for charges and tax) | 5.76% |
| Annual return (after deductions for charges but before tax) | 7.15% |
| Market index annual return (reflects no deduction for charges and tax) | 6.72% |

The market index return is the Morningstar Global All Cap Target Market Exposure NR Hedged NZD Index. This has been the market index since the inception of the fund. Additional information about the market index is available on the offer register at <https://disclose-register.companiesoffice.govt.nz>.

This shows the return after fund charges and tax for each year ending 31 March since the fund started. The last bar shows the average annual return since the fund started, up to 31 March 2025.

Important: This does not tell you how the fund will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

What fees are investors charged?

Investors in the InvestNow Foundation Series Hedged Total World Fund are charged fund charges which are:

| | % of net asset value (including GST) |
|---|---|
| Total fund charges ⁱⁱ | 0.07% |
| Which are made up of: | |
| Total manager and administration charges | 0.07% |
| Including: | |
| Manager's basic fee | 0.07% |
| Other management and administration charges | 0.00% |

The charges outlined above represent the fees charged within the underlying ETFs (external management fees) that the underlying fund invests into and have been estimated based on information in the underlying ETFs' disclosure documents. Note that the fees within the underlying ETFs are not tax deductible. Investors are charged each time they buy (entry fee) or sell (exit fee) units in the underlying fund. These fees are charged to cover the costs of the underlying brokerage, foreign currency exchange, transaction fees and investment management service fees associated with investing in the underlying investments. The underlying fund's current entry and exit fees are 0.50%.

Investors may also be charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). See the PDS for the InvestNow KiwiSaver Scheme FS Core Equity Funds on the offer register at <https://disclose-register.companiesoffice.govt.nz> for more information about those fees.

Example of how this applies to an investor

Small differences in fees and charges can have a big impact on your investment over the long term.

Anthony had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Anthony received a return after fund charges were deducted of \$715 (that is 7.15% of his initial \$10,000). This gives Anthony a total return after tax of \$576 for the period.

What does the fund invest in?

This shows the types of assets that the fund invests in.

Actual Investment Mix

Foreign currency exposure was 99.78% hedged to New Zealand dollars as at 31 March 2025.

Other includes currency contracts.

Target Investment Mix

Top 10 investments

| | Name | % of Fund net assets | Type | Country | Credit Rating |

Further information

You can also obtain this information, the PDS for the InvestNow KiwiSaver Scheme FS Core Equity Funds, and some additional information from the offer register at <https://disclose-register.companiesoffice.govt.nz>.

Notes

- A combination of actual fund returns and market index returns have been used to determine the risk indicator as the fund has not been operating for the required five years. The risk indicator may therefore provide a less reliable indicator of the fund's future volatility. Market index returns have been used until February 2024 and fund returns thereafter.
- As the InvestNow Foundation Series Hedged Total World Fund only started accepting contributions on 8 February 2024 historical fee information is not available. The fund charges represent our best estimates of the fees and expenses that will be charged to the fund. These have been estimated using information provided by the underlying fund manager and by reference to the underlying fund's disclosure documents.
